

Protect More Than Your Hose

The benefits of a closed hose reel

Why Closed Reel vs. Open Reel is the Optimal Choice

Which One Better Protects Your Investment?

The Difference Is More Than Appearance

When selecting a hose reel, protecting your hose is just as important as storing it.

While open reels have long been the industry standard, a closed hose reel offers added protection that can improve hose life, reduce maintenance, and keep work areas looking their best.

CLOSED REEL BENEFITS

Protects the Hose

The enclosed housing helps shield the hose from:

- Dirt and dust
- Debris
- Accidental impacts
- UV exposure (outdoor applications)
- Everyday wear

Longer hose life and fewer replacements.

Keeps Work Areas Cleaner

A closed reel minimizes exposure to contaminants and helps maintain a cleaner, more professional workspace.

Ideal for:

- Manufacturing
- Food & Beverage
- Automotive
- Maintenance facilities
- Service shops

Reduces Hose Wear

Keeping the hose enclosed helps reduce:

- Abrasion
- Kinks
- Crushing
- Premature deterioration

Less wear means lower maintenance costs over time.

Closed Reel v. Open Reel

Feature	Closed Reel	Open Reel
Protects hose from dirt & debris	✓	Limited
Shields hose from accidental damage	✓	✗
Cleaner appearance	✓	✗
Helps extend hose life	✓	Limited
Protects against UV exposure	✓	✗
Easy hose inspection	✓	✓
Ideal for harsh environments	✓	☉

Why Choose the CEJN SafetyReel G2?

Extended reach. Maximum performance.

The CEJN SafetyReel G2 combines premium construction with an enclosed design that helps protect your hose while improving workplace safety and organization.

Longer reach and maximum performance

Available with hose lengths up to 30 m and cable lengths up to 25 m, the SafetyReel G2 delivers high flow and reliable power for applications that demand extended reach.

Same hose for both air and fluids

You no longer have to choose between a hose for air or fluids – this versatile hose is designed for both. Enjoy the convenience and efficiency of a single solution.

3-phase and overload protection

The cable reel has a built-in safety fuse that cuts power if it overheats, preventing short circuits and ensuring safe use. A 3-phase (400V) version is also available for maximum performance.

Viscosity brake function

The SafetyReel G2 features our innovative, pending-patent Viscosity Brake. This braking system is designed with precision and delivers consistent, reliable performance while providing an unmatched operational lifespan.

Improved latch function

The new auto-stop function, with its short built-in locking points, allows the hose or cable to lock instantly whenever you stop pulling, placing it exactly at the distance you need. With a simple pull, it rolls up again.

Easy latch deactivation

Don't want the hose or cable to lock? The new SafetyReel makes the latch deactivation very easy. You simply remove the side cover and lift the latch to a non-active position, and you can just as easily activate the latch again.

+ all the other SafetyReel features

The SafetyReel G2 hose and cable reel has the same great benefits as its predecessor, such as slow retraction, precise hose guiding, a tripping-prevention stop ball, and easy installation and (hose reel) maintenance.

A SafetyReel for every need

CEJN SafetyReel is a premium collection of retractable hose reels and retractable cable reels. Each reel is designed for its specific application, yet they share many of the same high-quality features. Within our wide assortment of hose reels, you'll find variants suitable for a variety of media: compressed air hose reels, fluids/water hose reels, breathing air hose reels, and electrical cable reels.

A growing product range

We are continually expanding our product offerings with innovative solutions tailored to enhance your operations. Visit www.cejn.com for the latest updates.

Made in Sweden since 1955

We have been producing professional, high-quality and innovative quick connect couplings here at CEJN since our first patented coupling was launched in 1955. CEJN is an independent global niche company with its head office in the heart of Sweden. Over the years we have expanded to 22 locations worldwide and are supplying products and services to virtually every industry segment. At CEJN, we are united by our five core values: safety, environment, quality, innovation and performance. They are our cornerstones and define who we are, how we work, what we believe in and what we stand for.
