**STATEMENT REGARDING THE SAFE DRINKING WATER AND TOXIC
ENFORCEMENT ACT OF 1986**

The market CEJN serves is the professional industrial market where products are marketed and intended to be sold to OEMs and through distributors for professional use.

RE: CEJN Compliance with California's Safe Drinking Water and Toxic Enforcement Act of 1986

There could be one or more chemicals used in the manufacturing of CEJN's couplings and blow guns that are subject to Proposition 65. Although most of our products are below the proposition 65 standards, it would be logistically impractical to certify each and every product. Therefore, CEJN will apply the appropriate warning label to all applicable products that are sold and shipped into the State of California provided the order originates from CEJN's Gurnee or Houston facility.

IMPORTANT: Multi State distributors

DUE to the State of California's Proposition 65 law, CEJN does not authorize any CEJN distributor/agent/wholesaler to sell/invoice or ship any CEJN products into the State of California, UNLESS the order is originated from CEJN's Gurnee or Houston facility. This action will ensure that CEJN and the CEJN supply chain is in total compliance with the laws of the State of California.

IMPORTANT: OEMs

DUE to the State of California's Proposition 65 law, CEJN will apply the appropriate warning label to all applicable products that are sold and shipped directly into the State of California, provided the order originates from CEJN's Gurnee or Houston facility. OEMs in other states that are incorporating our products or components into theirs, will have the responsibility to label their finished manufactured product, if applicable, according to the laws of the State of California.
