eSafe™

The New Generation

No more need to choose between performance and safety!

New addition to the eSafe family

After the launch of eSafe, markets quickly realized the economic and environmental value. The new couplings instantly became a success. Now CEJN repeats the success with our two new series. We're happy to announce that during 2015 the eSafe range welcomes two new series: 430 and 550 (ISO 6150 B / A-A 59439).

eSafe™

- **Highest flow on the market**
- **Leak free and energy saving**
- **Vented safety function**
- **Compact design**
- **Extreme durability**
- **Easy handling**

IN 2015 CEJN CELEBRATES SIX DECADES OF SUCCESS within the quick connect coupling market. 60 years with the focus on safety, environment, quality, innovation and performance.

Therefore it is of no surprise that the eSafe range from CEJN is setting new standards within the industry by combining safety with performance to save energy and reduce compressor running costs.

eSafe comply with the international standard ISO 4414 and the European standard EN 983.

eSafe Features

High Flow

eSafe has the highest flow on the coupling market maximising tool performance

Leak Free and Energy Saving

Using CEJN stream-line connectors results in no wastage through leaks

Safety Function

eSafe vents the down streaming pressure before disconnection, reducing noise and hose whip

Compact Design

eSafe is the first safety coupling on the market with the dimensions of a standard coupling

Extreme Durability

Tests have shown that eSafe is extremely durable against impacts, vibrations and swivelling

Easy Handling

eSafe is ergonomic and one hand operated, just pull the sleeve and the coupling will automatically vent before disconnecting

It Pays to BeSafe. Can you afford not to be?
